Designer Oak Bi-Fold Door Sets

Impressive, Clear-Faced Oak With A Luxury Finish

Overview

Russell Timber Technology **Solid Oak Doors** offer a classic finish exuding quality for the ultimate entrance to a home. The range combines **superior appearance with superior performance**, to represent quality insulated entrance doors to suit specific project needs.

Bi-Fold Doors open up your living space to enhance other internal and external areas, creating extended open spaces between rooms and the great outdoors.

The soft honey glow of clear faced Oak can be reflected in the versatile product range which comes in comprehensive configurations to suit their location.

Our range of high performance and stylish Oak Bi-Fold Doors achieve a **U-Value of 0.7W/m²K** and a **DB of 54**. They are available in a number of configurations and are compatible with our **Contemporary, Premium and Designer Oak** ranges.

Primarily all units of the system slide to one side or can be split in the middle folding equally to either side. Alternatively they can be supplied with a lead door for day to day use with the balance folding to the opposite side.

These can also be manufactured for internal locations where walls and living spaces require division or privacy.

Bi-Fold Doors can be either Outward or Inward opening. The Outward opening solution ensures no conflict with internal living space. An Inward opening multi-functional door system enables you to use the lead door for ventilation and access whilst the balance of the system neatly stacks on the opposite side.

Solar control glass and other customisations, such as blinds within the glass, are all available.

All Oak products are manufactured from timbers with certified FSC Full Chain of Custody.

All products and production are subject to continuous development. The company reserves the right to amend details and sizes without notice
